### PRODUCT DESCRIPTION:

**Skid Resistant Additive** is a finely graded additive for sealers and coatings, leaving a unique textured durable surface. This product will stay suspended in solution without continuous stirring. Skid Resistant Additive can be used in most sealers and coatings where increased slip resistance is desired.

It can be used indoors or outdoors, especially over decorative concrete surfaces where other nonskid materials can not be used because of their color.

### APPLICATION

**Procedure** – Mix sealer or coating to proper consistency. Add prescribed amount of Skid Resistant Additive and remix until properly dispersed. Apply sealer or coating as directed without over rolling. This product is fine enough that it can also be used in spray applications.

**Coverage** – Skid Resistant Additive is added at one pound per five gallons of sealer or coating. Use 1 x 8 oz. cup (provided) for each gallon.

\* FOR USE BY LICENSED and/or TRAINED CONTRACTORS.

### KEEP AWAY FROM CHILDREN.
